## **DETAILED ACTION**

### **Claim Rejections - 35 USC § 112**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2, 3, 6-10 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The amendments which have changed recitations of vibration exciters (i.e., plural) to vibration exciter (i.e., singular) render the claims indefinite because parent claim 1 requires a plurality of exciters. This is the case because there are a plurality of masses positively recited and each of these masses are positively recited as having at least one vibration exciter.

Therefore, a plurality of masses denotes a plurality of exciters. The claims as originally presented were correct. The amendments render the claims indefinite because it is unclear which exciters include the elements recited with respect to the single exciter. Because the claims have been examined in a particular manner with respect to these elements and because the amendments to the claims render them indefinite, these claims must be restored to the language in which they were originally examined.

Regarding claim 12, while the amendment does include a plurality of vibration exciters, the manner in which the limitations are recited is not only redundant but also indefinite. Again, the claims must be restored to the language as originally examined.
